

ACI STRUCTURAL JOURNAL

INDEX VOLUME 101, 2004

From a Journal of the American Concrete Institute, January through December 2004

American Concrete Institute*
Advancing concrete knowledge

AMERICAN CONCRETE INSTITUTE, Farmington Hills, Michigan

Remove this section and include it with your January through December 2004 Volume 101 issues of the *ACI Structural Journal*.

A

- Abdel-Sayed, G.**
—Prediction of crack width for fiber-reinforced polymer-reinforced concrete beams (101-S53) July-Aug. 2004 532
—Strengthening of cantilever and continuous beams using new triaxially braided ductile fabric (101-S24) Mar.-Apr. 2004 237
- Acoustic transmission technique for evaluating fatigue damage in concrete bridge deck slabs** (101-S01) Butt, S. D.; Limaye, V.; Mufti, A. A.; and Bakht, B., Jan.-Feb. 2004 3
- Adhikary, B. B.**—Shear strengthening of reinforced concrete beams using fiber-reinforced polymer sheets with bonded anchorage (101-S65) Sept.-Oct. 2004 660
- Al-Shaleh, K. S.**—Minimum transverse reinforcement in 65 MPa concrete beams (101-S87) Nov.-Dec. 2004 872
- Analysis**
—Diaphragm effects in rectangular reinforced concrete buildings (101-S60) Barron, J. M., and Hueste, M. B. D., Sept.-Oct. 2004 615
—Nonlinear finite element analysis of reinforced concrete beam-column connections (101-S59) Hegger, J.; Sherif, A.; and Roeser, W., Sept.-Oct. 2004 604
- Analysis and design of concrete columns for biaxial bending—overview** (101-S42) Furlong, R. W.; Hsu, C.-T. T.; and Mirza, S. A., May-June 2004 413
- Analytical model to evaluate failure behavior of plated reinforced concrete beams strengthened for shear** (101-S74) Colotti, V.; Spadea, G.; and Swamy, R. N., Nov.-Dec. 2004 755
- Anchorage**
—Anchorage length of near-surface mounted fiber-reinforced polymer bars for concrete strengthening—experimental investigation and numerical modeling (101-S28) De Lorenzis, L.; Lundgren, K.; and Rizzo, A., Mar.-Apr. 2004 269
—Anchorage length of near-surface mounted fiber-reinforced polymer rods for concrete strengthening—analytical modeling (101-S38) De Lorenzis, L., May-June 2004 375
—Breakout capacity of anchors in concrete—part 1: tension (101-S80) Shirvani, M.; Klingner, R. E.; and Graves III, H. L., Nov.-Dec. 2004 812
—Breakout capacity of anchors in concrete—part 2: shear (101-S81) Muratli, H.; Klingner, R. E.; and Graves III, H. L., Nov.-Dec. 2004 821
—Concrete-steel bond model for use in finite element modeling of reinforced concrete structures (101-S50) Lowes, L. N.; Moehle, J. P.; and Govindjee, S., July-Aug. 2004 501
- Anchorage length of near-surface mounted fiber-reinforced polymer bars for concrete strengthening—experimental investigation and numerical modeling** (101-S28) De Lorenzis, L.; Lundgren, K.; and Rizzo, A., Mar.-Apr. 2004 269
- Anchorage length of near-surface mounted fiber-reinforced polymer rods for concrete strengthening—analytical modeling** (101-S38) De Lorenzis, L., May-June 2004 375
- Anchorage zones**—Behavior of fiber-reinforced polymer-reinforced anchorage zones for post-tensioned concrete structures (101-S61) Choi, M.-C., and Ibell, T. J., Sept.-Oct. 2004 625
- Ansley, M.**—M- ϕ -P diagrams for concrete sections under biaxial flexure and axial compression (101-S13) Jan.-Feb. 2004 114
- Anwar Hossain, K. M.**—Design aspects of double skin profiled composite framed shearwalls in construction and service stages (101-S11) Jan.-Feb. 2004 94
- Arduini, M.**—Performance of one-way reinforced concrete slabs with externally bonded fiber-reinforced polymer strengthening (101-S19) Mar.-Apr. 2004 193
- Asadpour, N.**—Global nonlinear dynamic analysis of concrete chimneys in frequency domain (101-S35) May-June 2004 341
- Ashraf, M.**—Shear strengthening of reinforced concrete beams using fiber-

B

- reinforced polymer sheets with bonded anchorage (101-S65) Sept.-Oct. 2004 660
- Attaalla, S. A.**—General analytical model for nominal shear stress of type 2 normal- and high-strength concrete beam-column joints (101-S08) Jan.-Feb. 2004 65
- Bakht, B.**
—Acoustic transmission technique for evaluating fatigue damage in concrete bridge deck slabs (101-S01) Jan.-Feb. 2004 3
—Precast concrete decks for slab-on-girder systems: a new approach (101-S40) May-June 2004 395
- Bar**
—Anchorage length of near-surface mounted fiber-reinforced polymer bars for concrete strengthening—experimental investigation and numerical modeling (101-S28) De Lorenzis, L.; Lundgren, K.; and Rizzo, A., Mar.-Apr. 2004 269
—Near-surface-mounted fiber-reinforced polymer reinforcements for flexural straightening of concrete structures (101-S71) El-Hacha, R., and Rizkalla, S. H., Sept.-Oct. 2004 717
—Serviceability of concrete bridge deck slabs reinforced with fiber-reinforced polymer composite bars (101-S72) El-Salakawy, E., and Benmokrane, B., Sept.-Oct. 2004 727
- Barron, J. M.**—Diaphragm effects in rectangular reinforced concrete buildings (101-S60) Sept.-Oct. 2004 615
- Beam**
—Flexural stiffness of reinforced concrete columns and beams: analytical approach (101-S36) Khuntia, M., and Ghosh, S. K., May-June 2004 351
—Flexural stiffness of reinforced concrete columns and beams: experimental verification (101-S37) Khuntia, M., and Ghosh, S. K., May-June 2004 364
—Minimum transverse reinforcement in 65 MPa concrete beams (101-S87) Rahal, K. N., and Al-Shaleh, K. S., Nov.-Dec. 2004 872
—Near-surface-mounted fiber-reinforced polymer reinforcements for flexural strengthening of concrete structures (101-S71) El-Hacha, R., and Rizkalla, S. H., Sept.-Oct. 2004 717
—Shear strengthening reinforced concrete beams with fiber-reinforced polymer: assessment of influencing parameters and required research (101-S22) Boushelham, A., and Chaallal, O., Mar.-Apr. 2004 219
—Stress redistribution in cyclically loaded reinforced concrete beams (101-S27) Heffernan, P. J.; Erki, M.-A.; and DuQuesnay, D. L., Mar.-Apr. 2004 261
- Beams**
—Analytical model to evaluate failure behavior of plated reinforced concrete beams strengthened for shear (101-S74) Colotti, V.; Spadea, G.; and Swamy, R. N., Nov.-Dec. 2004 755
—Bond mechanism of near-surface-mounted fiber-reinforced polymer bars for flexural strengthening of concrete structures (101-S82) Hassan, T. K., and Rizkalla, S. H., Nov.-Dec. 2004 830
—Length effect on ductility of concrete in uniaxial and flexural compression (101-S75) Borges, J. U. A.; Subramaniam, K. V.; Weiss, W. J.; Shah, S. P.; and Bittencourt, T. N., Nov.-Dec. 2004 765
—Selective upgrade of underdesigned reinforced beam-column joints using carbon fiber-reinforced concrete (101-S69) Prota, A.; Nanni, A.; Manfredi, G.; and Cosenza, E., Sept.-Oct. 2004 699
- Beam-column**
—Behavior of concrete-filled hollow structural section beam columns to seismic shear displacements (101-S05) Hardika, M. S., and Gardner, N. J., Jan.-Feb. 2004 39
—General analytical model for nominal shear stress of type 2 normal- and high-strength concrete beam-column joints (101-S08) Attaalla, S. A., Jan.-Feb. 2004 65
—Nonlinear finite element analysis of reinforced concrete beam-column connections (101-S59) Hegger, J.; Sherif, A.; and Roeser, W., Sept.-Oct. 2004 604
- Behavior of concrete-filled hollow structural section beam columns to seismic shear displacements** (101-S05) Hardika, M. S., and Gardner, N. J., Jan.-Feb. 2004 39
- Behavior of fiber-reinforced polymer-reinforced anchorage zones for post-tensioned concrete structures** (101-S61) Choi, M.-C., and Ibell, T. J., Sept.-Oct. 2004 625

Behavior of high-strength concrete corner columns intersected by weaker slabs with different thicknesses (101-S02) Lee, S. C., and Mendis, P., Jan.-Feb. 2004	11
Behavior of reinforced concrete columns under variable axial loads (101-S14) Esameily, A., and Xiao, Y., Jan.-Feb. 2004	124
Benmokrane, B. —Serviceability of concrete bridge deck slabs reinforced with fiber-reinforced polymer composite bars (101-S72) Sept.-Oct. 2004	72
Bischoff, P. H. —Tension stiffening and cracking of high-strength reinforced concrete tension members (101-S44) July-Aug. 2004	447
Biskinis, D. E. —Degradation of shear strength of reinforced concrete members with inelastic cyclic displacements (101-S76) Nov.-Dec. 2004	773
Bittencourt, T. N. —Length effect on ductility of concrete in uniaxial and flexural compression (101-S75) Nov.-Dec. 2004	765
Bonacci, J. F. —Composite response of high-strength concrete confined by circular steel tube (101-S46) July-Aug. 2004	466
Bond	
—Concrete-steel bond model for use in finite element modeling of reinforced concrete structures (101-S50) Lowes, L. N.; Moehle, J. P.; and Govindjee, S., July-Aug. 2004	501
—Cyclic behavior of columns with short lap splices (101-S79) Melek, M., and Wallace, J. W., Nov.-Dec. 2004	802
—Bond mechanism of near-surface-mounted fiber-reinforced polymer bars for flexural strengthening of concrete structures (101-S82) Hassan, T. K., and Rizkalla, S. H., Nov.-Dec. 2004	830
—Effect of confinement using fiber-reinforced polymer or fiber-reinforced concrete on seismic performance of gravity load-designed columns (101-S06) Harajli, M. H., and Rteil, A. A., Jan.-Feb. 2004	47
Bond (concrete to reinforcement) —Experimental and analytical evaluation of bond strength of reinforcement in fiber-reinforced polymer-wrapped high-strength concrete beams (101-S73) Hamad, B. S.; Soudki, K. A.; Harajli, M. H.; and Rteil, A. A., Nov.-Dec. 2004	747
Bond mechanism of near-surface-mounted fiber-reinforced polymer bars for flexural strengthening of concrete structures (101-S82) Hassan, T. K., and Rizkalla, S. H., Nov.-Dec. 2004	830
Bond strength —Shear strengthening of reinforced concrete beams using fiber-reinforced polymer sheets with bonded anchorage (101-S65) Adhikary, B. B.; Mutsuyoshi, H.; and Ashraf, M., Sept.-Oct. 2004	660
Bond stress —Effect of confinement of bond strength between steel bars and concrete (101-S58) Harajli, M. H.; Hamad, B. S.; and Rteil, A. A., Sept.-Oct. 2004	595
Borges, J. U. A. —Length effect on ductility of concrete in uniaxial and flexural compress (101-S75) Nov.-Dec. 2004	765
Bousias, S. N. —Fiber-reinforced polymer retrofitting of rectangular reinforced concrete columns with or without corrosion (101-S51) July-Aug. 2004	512
Boushelham, A. —Shear strengthening reinforced concrete beams with fiber-reinforced polymer: assessment of influencing parameters and required research (101-S22) Mar.-Apr. 2004	219
Brachmann, I. —Drift-dependent confinement requirements for reinforced concrete columns under cyclic loading (101-S66) Sept.-Oct. 2004	669
Breakout —Breakout capacity of anchors in concrete—part 1: tension (101-S80) Shirvani, M.; Klingner, R. E.; and Graves III, H. L., Nov.-Dec. 2004	812
Breakout capacity of anchors in concrete—part 1: tension (101-S80) Shirvani, M.; Klingner, R. E.; and Graves III, H. L., Nov.-Dec. 2004	812
Breakout capacity of anchors in concrete—part 2: shear (101-S81) Muratli, H.; Klingner, R. E.; and Graves III, H. L., Nov.-Dec. 2004	821
Bridge	
—Flexural behavior of hybrid fiber-reinforced polymer/concrete beam/slab bridge component (101-S23) Burgueño, R.; Davol, A.; Zhao, L.; Seible, F.; and Karbhari, V. M., Mar.-Apr. 2004	228
—Seismic performance of two-column bents—part I: retrofit with carbon fiber-reinforced polymer fabrics (101-S56) Pulido, C.; Saiidi, M. S.; Sanders, D.; Itani, A.; and El-Azazy, S., July-Aug. 2004	558
—Seismic performance of two-column bents—part II: retrofit with infill walls (101-S63) Pulido, C.; Saiidi, M. S.; Sanders, D.; Itani, A.; and El-Azazy, S., Sept.-Oct. 2004	642
—Web crushing capacity of hollow rectangular bridge piers (101-S57) Hines, E. M., and Seible, F., July-Aug. 2004	569
Bridges	
—Force-displacement characterization of well-confined bridge piers (101-S54) Hines, E. M.; Restrepo, J. I.; and Seible, F., July-Aug. 2004	537
—Reinforced concrete bridge column performance enhancement through shotcrete jacketing (101-S34) Hamilton, C. H.; Pardoen, G. C.; Navalpakkam, S.; and Kanzanjy, R. P., May-June 2004	332
Bridge deck	
—Acoustic transmission technique for evaluation fatigue damage in concrete bridge deck slabs (101-S01) Butt, S. D.; Limaye, V.; Mufti, A. A.; and Bakht,	

B., Jan.-Feb. 2004	3
—Innovative bridge deck system using high-performance fiber-reinforced cement composites (101-S07) Naaman, A. E., and Chandrangs, K., Jan.-Feb. 2004	57
—Precast concrete decks for slab-on-girder systems: a new approach (101-S40) Mufti, A. A.; Bakht, B.; and Newhook, J. P., May-June 2004	395
—Serviceability of concrete bridge deck slabs reinforced with fiber-reinforced polymer composite bars (101-S72) El-Salakawy, E., and Benmokrane, B., Sept.-Oct. 2004	727
Browning, J.	
—Drift-dependent confinement requirements for reinforced concrete columns under cyclic loading (101-S66) Sept.-Oct. 2004	669
—Flat-rate design method for low- and medium-rise reinforced concrete structures (101-S43) July-Aug. 2004	435
Buckling —Interaction formula for reinforced concrete columns in fire conditions (101-S03) Tan, K. H., and Tang, C. Y., Jan.-Feb. 2004	19
Building code —Equivalent uniform moment diagram factor for reinforced concrete columns (101-S52) Tikka, T. K., and Mirza, S. A., July-Aug. 2004	521
Burgueño, R. —Flexural behavior of hybrid fiber-reinforced polymer/concrete beam/slab bridge component (101-S23) Mar.-Apr. 2004	228
Butt, S. D. —acoustic transmission technique for evaluating fatigue damage in concrete bridge deck slabs (101-S01) Jan.-Feb. 2004	3
C	
Carbon —Near-surface-mounted fiber-reinforced polymer reinforcements for flexural strengthening of concrete structures (101-S71) El-Hacha, R., and Rizkalla, S. H., Sept.-Oct. 2004	717
Cement —Innovative bridge deck system using high-performance fiber-reinforced cement composites (101-S07) Naaman, A. E., and Chandrangs, K., Jan.-Feb. 2004	57
Chaallal, O. —Shear strengthening reinforced concrete beams with fiber-reinforced polymer: assessment of influencing parameters and required research (101-S22) Mar.-Apr. 2004	219
Chandra Kishen, J. M. —Fracture of rock-concrete interfaces: laboratory tests and applications (101-S33) May-June 2004	325
Chandrangs, K. —Innovative bridge deck system using high-performance fiber-reinforced cement composites (101-S07) Jan.-Feb. 2004	57
Cheong, H. K. —Punching shear strength of slabs with openings and supported on rectangular columns (101-S67) Sept.-Oct. 2004	678
Cho, N.-Y.	
—Cracking behavior of reinforced concrete panel subjected to biaxial tension (101-S09) Jan.-Feb. 2004	76
—Stress-strain relationship of reinforced concrete subjected to biaxial tension (101-S20) Mar.-Apr. 2004	202
Cho, N.-S.	
—Cracking behavior of reinforced concrete panel subjected to biaxial tension (101-S09) Jan.-Feb. 2004	76
—Stress-strain relationship of reinforced concrete subjected to biaxial tension (101-S20) Mar.-Apr. 2004	202
Choi, B.-S. —Monte carlo simulation of immediate and time-dependent deflections of reinforced concrete beams and slabs (101-S62) Sept.-Oct. 2004	633
Choi, I.-K. —Cracking behavior of reinforced concrete panel subjected to biaxial tension (101-S09) Jan.-Feb. 2004	76
Choi, M.-C. —Behavior of fiber-reinforced polymer-reinforced anchorage zones for post-tensioned concrete structures (101-S61) Sept.-Oct. 2004	625
Chompreda, P. —Mechanical properties of high-strength concrete for prestressed members (101-S45) July-Aug. 2004	457
Choun, Y.-S. —Stress-strain relationship of reinforced concrete subjected to biaxial tension (101-S20) Mar.-Apr. 2004	202
Clarke, R. P. —Hysteretic behavior of ferrocement-retrofitted clay tile walls (101-S39) May-June 2004	387
Cline, D. B. H. —Mechanical properties of high-strength concrete for prestressed members (101-S45) July-Aug. 2004	457
Cloyd, J. E. —Investigation of minimum longitudinal reinforcement requirements for concrete columns using present-day construction materials (101-S16) Mar.-Apr. 2004	165
Colotti, V. —Analytical model to evaluate failure behavior of plated reinforced concrete beams strengthened for shear (101-S74) Nov.-Dec. 2004	755
Column	
—Analysis and design of concrete columns for biaxial bending—overview (101-S42) Furlong, R. W.; Hsu, C.-T. T.; and Mirza, S. A., May-June 2004	413
—Behavior of high-strength concrete corner columns intersected by weaker slabs with different thicknesses (101-S02) Lee, S. C., and Mendis, P., Jan.-Feb. 2004	11

—Behavior of reinforced concrete columns under variable axial loads (101-S14) Esameily, A., and Xiao, Y., Jan.-Feb. 2004	124	—Behavior of high-strength concrete corner columns intersected by weaker slabs with different thicknesses (101-S02) Lee, S. C., and Mendis, P., Jan.-Feb. 2004	11
—Composite response of high-strength concrete confined by circular steel tube (101-S46) McAteer, P.; Bonacci, J. F.; and Lachemi, M., July-Aug. 2004	466	—Breakout capacity of anchors in concrete—part 1: tension (101-S80) Shirvani, M.; Klingner, R. E.; and Graves III, H. L., Nov.-Dec. 2004	812
—Confining reinforcement for high-strength concrete columns (101-S32) Li, B., and Park, R., May-June 2004	314	—Breakout capacity of anchors in concrete—part 2: shear (101-S81) Murali, H.; Klingner, R. E.; and Graves III, H. L., Nov.-Dec. 2004	821
—Cracking behavior of reinforced concrete panel subjected to biaxial tension (101-S09) Cho, J.-Y.; Kim, N.-S.; Cho, N.-S.; and Choi, I.-K., Jan.-Feb. 2004	76	—Bond mechanism of near-surface-mounted fiber-reinforced polymer bars for flexural strengthening of concrete structures (101-S82) Hassan, T. K., and Rizkalla, S. H., Nov.-Dec. 2004	830
—Cyclic behavior of columns with short lap splices (101-S79) Melek, M., and Wallace, J. W., Nov.-Dec. 2004	802	—Cracking behavior of reinforced concrete panel subjected to biaxial tension (101-S09) Cho, J.-Y.; Kim, N.-S.; Cho, N.-S.; and Choi, I.-K., Jan.-Feb. 2004	76
—Degradation of shear strength of reinforced concrete members with inelastic cyclic displacement (101-S76) Biskinis, D. E.; Roupakias, G. K.; and Fardis, M. N., Nov.-Dec. 2004	773	—Fiber-reinforced polymer strengthening of two-way slabs (101-S64) Ebead, U., and Marzouk, H., Sept.-Oct. 2004	650
—Effect of confinement using fiber-reinforced polymer or fiber-reinforced concrete on seismic performance of gravity load-designed columns (101-S06) Harajli, M. H., and Rteil, A. A., Jan.-Feb. 2004	47	—Flexural behavior of concrete columns retrofitted with carbon fiber-reinforced polymer jackets (101-S70) Sause, R.; Harries, K. A.; Walkup, S. L.; Pessiki, S.; Ricles, J. M., Sept.-Oct. 2004	708
—Equivalent uniform moment diagram factor for reinforced concrete columns (101-S52) Tikka, T. K., and Mirza, S. A., July-Aug. 2004	521	—Fracture of rock-concrete interfaces: laboratory tests and applications (101-S33) Chandra Kishen, J. M., and Saouma, V. E., May-June 2004	325
—Fiber-reinforced polymer retrofitting of rectangular reinforced concrete columns with or without corrosion (101-S51) Bousias, S. N.; Triantafyllou, T. C.; Fardis, M. N.; Spathis, L.; and O'Regan, B. A., July-Aug. 2004	512	—Global nonlinear dynamic analysis of concrete chimneys in frequency domain (101-S35) Horr, A. M.; Safi, M.; and Asadpour, N., May-June 2004	341
—Flexural stiffness of reinforced concrete columns and beams: analytical approach (101-S36) Khuntia, M., and Ghosh, S. K., May-June 2004	351	—Near-surface-mounted fiber-reinforced polymer reinforcements for flexural strengthening of concrete structures (101-S71) El-Hacha, R., and Rizkalla, S. H., Sept.-Oct. 2004	717
—Flexural stiffness of reinforced concrete columns and beams: experimental verification (101-S37) Khuntia, M., and Ghosh, S. K., May-June 2004	364	—Precast concrete decks for slab-on-girder systems: a new approach (101-S40) Mufii, A. A.; Bakht, B.; and Newhook, J. P., May-June 2004	395
—High-workability concrete columns under concentric compression (101-S10) Lin, C.-H.; Lin, S.-P.; and Tseng, C.-H., Jan.-Feb. 2004	85	—Prestressing concrete using shape memory alloy tendons (101-S84) El-Tawil, S., and Ortega-Rosales, J., Nov.-Dec. 2004	846
—Investigation of minimum longitudinal reinforcement requirements for concrete columns using present-day construction materials (101-S16) Ziehl, P. H.; Cloyd, J. E.; and Kreger, M. E., Mar.-Apr. 2004	165	—Rectangular stress block for high-strength concrete (101-S47) Ozbakkaloglu, T., and Saatcioglu, M., July-Aug. 2004	475
—Punching shear strength of slabs with openings and supported on rectangular columns (101-S67) Teng, S.; Cheong, H. K.; Kuang, K. L.; and Geng, J. Z., Sept.-Oct. 2004	678	—Shear stiffness and strength of horizontal construction joints (101-S48) Djazmati, B., and Pincheira, J. A., July-Aug. 2004	484
—Rectangular stress block for high-strength concrete (101-S47) Ozbakkaloglu, T., and Saatcioglu, M., July-Aug. 2004	475	—Strengthening of cantilever and continuous beams using new triaxially braided ductile fabric (101-S24) Grace, N. F.; Ragheb, W. F.; and Abdel-Sayed, G., Mar.-Apr. 2004	237
—Seismic performance of two-column bents—part I: retrofit with carbon fiber-reinforced polymer fabrics (101-S56) Pulido, C.; Saiidi, M. S.; Sanders, D.; Itani, A.; and El-Azazy, S., July-Aug. 2004	558	—Strut-and-tie model for shear friction of concrete with fiber-reinforced polymer composites (101-S86) Saenz, N.; Pantelides, C. P.; and Reaveley, L. D., Nov.-Dec. 2004	863
Columns		Concrete masonry —Structural testing of enhanced post-tensioned concrete masonry walls (101-S85) Laursen, P. T., and Ingham, J. M., Nov.-Dec. 2004	852
—Drift-dependent confinement requirements for reinforced concrete columns under cyclic loading (101-S66) Brachmann, I.; Browning, J.; and Matamoros, A., Sept.-Oct. 2004	669	Concrete pavement —New design approach for steel fiber-reinforced concrete slabs-on-ground based on fracture mechanics (101-S30) Meda, A., and Pizzari, G. A., May-June 2004	298
—Reinforced concrete bridge column performance enhancement through shotcrete jacketing (101-S34) Hamilton, C. H.; Pardo, G. C.; Navalpakkam, S.; and Kanzanji, R. P.; May-June 2004	332	Concrete strength —Monte carlo simulation of immediate and time-dependent deflections of reinforced concrete beams and slabs (101-S62) Choi, B.-S.; Scanlon, A.; and Johnson, P. A., Sept.-Oct. 2004	633
—Seismic performance of two-column bents—part II: retrofit with infill walls (101-S63) Pulido, C.; Saiidi, M. S.; Sanders, D.; Itani, A.; and El-Azazy, S., Sept.-Oct. 2004	642	Concrete-steel bond model for use in finite element modeling of reinforced concrete structures (101-S50) Lowes, L. N.; Moehle, J. P.; and Govindjee, S., July-Aug. 2004	501
—Selective upgrade of underdesigned reinforced beam-column joints using carbon fiber-reinforced concrete (101-S69) Prota, A.; Nanni, A.; Manfredi, G.; and Cosenza, E., Sept.-Oct. 2004	699	Confined concrete	
Combined torsion and bending in reinforced and prestressed beams (100-S17)		—Cracking behavior of reinforced concrete panel subjected to biaxial tension (101-S09) Cho, J.-Y.; Kim, N.-S.; Cho, N.-S.; and Choi, I.-K., Jan.-Feb. 2004	76
—Rahal, K. N., and Collins, M. P., Mar.-Apr. 2003	157	—Effect of confinement of bond strength between steel bars and concrete (101-S58) Harajli, M. H.; Hamad, B. S.; and Rteil, A. A., Sept.-Oct. 2004	595
—Disc. by Solanki, H., Jan.-Feb. 2004	135	—High-workability concrete columns under concentric compression (101-S10) Lin, C.-H.; Lin, S.-P.; and Tseng, C.-H., Jan.-Feb. 2004	85
Composite response of high-strength concrete confined by circular steel tube (101-S46) McAteer, P.; Bonacci, J. F.; and Lachemi, M., July-Aug. 2004	466	Confinement	
Compression		—Composite response of high-strength concrete confined by circular steel tube (101-S46) McAteer, P.; Bonacci, J. F.; and Lachemi, M., July-Aug. 2004	466
—Limits of reinforcement in 2002 aci code: transition, flaws, and solution (101-S21) Naaman, A. E., Mar.-Apr. 2004	209	—Experimental and analytical evaluation of bond strength of reinforcement in fiber-reinforced polymer-wrapped high-strength concrete beams (101-S73) Hamad, B. S.; Soudki, K. A.; Harajli, M. H.; and Rteil, A. A., Nov.-Dec. 2004	747
—Web crushing capacity of hollow rectangular bridge piers (101-S57) Hines, E. M., and Seible, F., July-Aug. 2004	569	—Flexural behavior of concrete columns retrofitted with carbon fiber-reinforced polymer jackets (101-S70) Sause, R.; Harries, K. A.; Walkup, S. L.; Pessiki, S.; Ricles, J. M., Sept.-Oct. 2004	708
Compression field modeling of reinforced concrete subjected to reversed loading: verification (101-S15) Palermo, D., and Vecchio, F. J., Mar.-Apr. 2004	155	Confining reinforcement for high-strength concrete columns (101-S32) Li, B., and Park, R., May-June 2004	314
Compressive strength		Consolazio, G. R. —M- ϕ -P diagrams for concrete sections under biaxial flexure and axial compression (101-S13) Jan.-Feb. 2004	114
—Influence of constituents of concrete on its tensile strength and shear strength (101-S04) Desai, S. B., Jan.-Feb. 2004	29	Construction	
—Mechanical properties of high-strength concrete for prestressed members (101-S45) Hueste, M. B. D.; Chomprea, P.; Trejo, D.; Cline, D. B. H.; and Keating, P. B., July-Aug. 2004	457	—Design aspects of double skin profiled composite framed shearwalls in construction and service stages (101-S11) Anwar Houssain, K. M., and Wright, H. D., Jan.-Feb. 2004	94
Concrete			
—Behavior of concrete-filled hollow structural section beam columns to seismic shear displacements (101-S05) Hardika, M. S., and Gardner, N. J., Jan.-Feb. 2004	39		

—Structural capacity reduction for drilled shafts with minor flaws (101-S29) Sarhan, H. A.; O'Neill, M. W.; and Tabsh, S. W., May-June 2004	291
Construction joint —Shear stiffness and strength of horizontal construction joints (101-S48) Djazmati, B., and Pincheira, J. A., July-Aug. 2004	484
Conte, J. P. —Nonlinear modeling and analysis of slender reinforced concrete walls (101-S68) Sept.-Oct. 2004	688
Corrosion	
—Fiber-reinforced polymer retrofitting of rectangular reinforced concrete columns with or without corrosion (101-S51) Bousias, S. N.; Triantafillou, T. C.; Fardis, M. N.; Spathis, L.; and O'Regan, B. A., July-Aug. 2004	512
—Precast concrete decks for slab-on-girder systems: a new approach (101-S40) Mufti, A. A.; Bakht, B.; and Newhook, J. P., May-June 2004	395
Cosenza, E. —Selective upgrade of underdesigned reinforced beam-column joints using carbon fiber-reinforced concrete (101-S69) Sept.-Oct. 2004	699
Crack	
—Acoustic transmission technique for evaluating fatigue damage in concrete bridge deck slabs (101-S01) Butt, S. D.; Limaye, V.; Mufti, A. A.; and Bakht, B., Jan.-Feb. 2004	3
—Innovative bridge deck system using high-performance fiber-reinforced cement composites (101-S07) Naaman, A. E., and Chandrangs, K., Jan.-Feb. 2004	57
—Investigation of pre- and postcracking shear behavior of prestressed concrete beams using innovative measuring techniques (101-S18) Hegger, J.; Sherif, A.; and Götz, S., Mar.-Apr. 2004	183
—Prediction of crack width for fiber-reinforced polymer-reinforced concrete beams (101-S53) Salib, S. R., and Abdel-Sayed, G., July-Aug. 2004	532
Cracking	
—Horizontal cracking in continuously reinforced concrete pavements (101-S77) Kim, S.-M., and Won, M. C., Nov.-Dec. 2004	784
—Minimum transverse reinforcement in 65 MPa concrete beams (101-S87) Rahal, K. N., and Al-Shaleh, K. S., Nov.-Dec. 2004	872
—Shrinkage cracking and crack control in restrained reinforced concrete members (101-S83) Nejadi, S., and Gilbert, I., Nov.-Dec. 2004	840
—Tension stiffening and cracking of high-strength reinforced concrete tension members (101-S44) Fields, K., and Bischoff, P. H., July-Aug. 2004	447
Cracking behavior of reinforced concrete panel subjected to biaxial tension (101-S09) Cho, J.-Y.; Kim, N.-S.; Cho, N.-S.; and Choi I.-K., Jan.-Feb. 2004	76
Crack control	
—Performance of bridge deck link slabs designed with ductile engineered cementitious composite (101-S78) Kim, Y. Y.; Fischer, G.; and Li, V. C., Nov.-Dec. 2004	792
—Shrinkage cracking and crack control in restrained reinforced concrete members (101-S83) Nejadi, S., and Gilbert, I., Nov.-Dec. 2004	840
Crack width prediction using compatibility-aided strut-and-tie model (100-S43)	
—Zhu, R. R. H.; Wanichakorn, W.; Hsu, T. T. C.; and Vogel, J., July-Aug. 2003	413
—Disc. by Solanki, H., May-June 2004	424
Cracks —Compression field modeling of reinforced concrete subjected to reversed loading: verification (101-S15) Palermo, D., and Vecchio, F. J., Mar.-Apr. 2004	155
Creep	
—Investigation of minimum longitudinal reinforcement requirements for concrete columns using present-day construction materials (101-S16) Ziehl, P. H.; Cloyd, J. E.; and Kreger, M. E., Mar.-Apr. 2004	165
—Shrinkage cracking and crack control in restrained reinforced concrete members (101-S83) Nejadi, S., and Gilbert, I., Nov.-Dec. 2004	840
Cyclic behavior of columns with short lap splices (101-S79) Melek, M., and Wallace, J. W., Nov.-Dec. 2004	802

D

Damage —Length effect on ductility of concrete in uniaxial and flexural compression (101-S75) Borges, J. U. A.; Subramaniam, K. V.; Weiss, W. J.; Shah, S. P.; and Bittencourt, T. N., Nov.-Dec. 2004	765
Davol, A. —Flexural behavior of hybrid fiber-reinforced polymer/concrete beam/slab bridge component (101-S23) Mar.-Apr. 2004	228
Deflection —Monte carlo simulation of immediate and time-dependent deflections of reinforced concrete beams and slabs (101-S62) Choi, B.-S.; Scanlon, A.; and Johnson, P. A., Sept.-Oct. 2004	633
Deformation	
—Degradation of shear strength of reinforced concrete members with inelastic cyclic displacement (101-S76) Biskinis, D. E.; Roupakis, G. K.; and Fardis, M. N., Nov.-Dec. 2004	773

—Load-deformation responses of slender reinforced concrete walls (101-S12) Massone, L. M., and Wallace, J. W., Jan.-Feb. 2004	103
—Performance of bridge deck link slabs designed with ductile engineered cementitious composite (101-S78) Nov.-Dec. 2004	792
Degradation of shear strength of reinforced concrete members with inelastic cyclic displacements (101-S76) Biskinis, D. E.; Roupakis, G. K.; and Fardis, M. N., Nov.-Dec. 2004	773
Delamination —Performance of one-way reinforced concrete slabs with externally bonded fiber-reinforced polymer strengthening (101-S19) Arduini, M.; Nanni, A.; and Romagnolo, M., Mar.-Apr. 2004	193
De Lorenzis, L.	
—Anchorage length of near-surface mounted fiber-reinforced polymer bars for concrete strengthening—experimental investigation and numerical modeling (101-S28) Mar.-Apr. 2004	269
—Anchorage length of near-surface mounted fiber-reinforced polymer rods for concrete strengthening—analytical modeling (101-S38) May-June 2004	375
Desai, S. B. —Influence of constituents of concrete on its tensile strength and shear strength (101-S04) Jan.-Feb. 2004	29
Design	
—Equivalent uniform moment diagram factor for reinforced concrete columns (101-S52) Tikka, T. K., and Mirza, S. A., July-Aug. 2004	521
—Global nonlinear dynamic analysis of concrete chimneys in frequency domain (101-S35) Horr, A. M.; Safi, M.; and Asadpour, N., May-June 2004	341
—Nonlinear finite element analysis of reinforced concrete beam-column connections (101-S59) Hegger, J.; Sherif, A.; and Roeser, W., Sept.-Oct. 2004	604
—Stress redistribution in cyclically loaded reinforced concrete beams (101-S27) Heffernan, P. J.; Erki, M.-A.; and DuQuesnay, D. L., Mar.-Apr. 2004	261
—Structural capacity reduction for drilled shafts with minor flaws (101-S29) Sarhan, H. A.; O'Neill, M. W.; and Tabsh, S. W., May-June 2004	291
—Structural testing of enhanced post-tensioned concrete masonry walls (101-S85) Laursen, P. T., and Ingham, J. M., Nov.-Dec. 2004	852
Design aspects of double skin profiled composite framed shearwalls in construction and service stages (101-S11) Anwar Hossain, K. M., and Wright, H. D., Jan.-Feb. 2004	94
Design codes —Experimental and analytical evaluation of bond strength of reinforcement in fiber-reinforced polymer-wrapped high-strength concrete beams (101-S73) Hamad, B. S.; Soudki, K. A.; Harajli, M. H.; and Rteil, A. A., Nov.-Dec. 2004	747
Design of reinforced concrete solids using stress analysis (100-S78)	
—Foster, S. J.; Marti, P.; and Mojsilovic, N., Nov.-Dec. 2003	758
—Disc. by Sánchez Filho, E. S., and Barbosa, M. T., Sept.-Oct. 2004	737
Design strength —Flat-rate design method for low- and medium-rise reinforced concrete structures (101-S43) Matamoros, A.; García, L. E.; Browning, J.; and Lepage, A., July-Aug. 2004	435
Development length —Effect of confinement of bond strength between steel bars and concrete (101-S58) Harajli, M. H.; Hamad, B. S.; and Rteil, A. A., Sept.-Oct. 2004	595
Diagonal cracking —Shear behavior of full-scale post-tensioned prestressed concrete bridge girders (101-S17) Oh, B. H., and Kim, K. S., Mar.-Apr. 2004	176
Diaphragm effects in rectangular reinforced concrete buildings (101-S60) Barron, J. M., and Hueste, M. B. D., Sept.-Oct. 2004	615
Djazmati, B. —Shear stiffness and strength of horizontal construction joints (101-S48) July-Aug. 2004	484
Double-head studs as shear reinforcement in concrete i-beams (101-S55) Gayed, R. B., and Ghali, A., July-Aug. 2004	549
Drift-dependent confinement requirements for reinforced concrete columns under cyclic loading (101-S66) Brachmann, I.; Browning, J.; and Matamoros, A., Sept.-Oct. 2004	669
Ductility	
—Behavior of concrete-filled hollow structural section beam columns to seismic shear displacements (101-S05) Hardika, M. S., and Gardner, N. J., Jan.-Feb. 2004	39
—Confining reinforcement for high-strength concrete columns (101-S32) Li, B., and Park, R., May-June 2004	314
—Cracking behavior of reinforced concrete panel subjected to biaxial tension (101-S09) Cho, J.-Y.; Kim, N.-S.; Cho, N.-S.; and Choi, I.-K., Jan.-Feb. 2004	76
—Double-head studs as shear reinforcement in concrete i-beams (101-S55) Gayed, R. B., and Ghali, A., July-Aug. 2004	549
—Effect of confinement using fiber-reinforced polymer or fiber-reinforced concrete on seismic performance of gravity load-designed columns (101-S06) Harajli, M. H., and Rteil, A. A., Jan.-Feb. 2004	47

—High-workability concrete columns under concentric compression (101-S10) Lin, C.-H.; Lin, S.-P.; and Tseng, C.-H., Jan.-Feb. 2004	85
—Length effect on ductility of concrete in uniaxial and flexural compression (101-S75) Borges, J. U. A.; Subramaniam, K. V.; Weiss, W. J.; Shah, S. P.; and Bittencourt, T. N., Nov.-Dec. 2004	765
—Selective upgrade of underdesigned reinforced beam-column joints using carbon fiber-reinforced concrete (101-S69) Prota, A.; Nanni, A.; Manfredi, G.; and Cosenza, E., Sept.-Oct. 2004	699
—Strengthening of cantilever and continuous beams using new triaxially braided ductile fabric (101-S24) Grace, N. F.; Ragheb, W. F.; and Abdel-Sayed, G., Mar.-Apr. 2004	237
Ductility stiffness —Torsional behavior of normal- and high-strength concrete beams (101-S31) Fang, I.-K., and Shiau, J.-K., May-June 2004	304
DuQuesnay, D. L. —Stress redistribution in cyclically loaded reinforced concrete beams (101-S27) Mar.-Apr. 2004	261
Durability	
—Performance of bridge deck link slabs designed with ductile engineered cementitious composite (101-S78) Kim, Y. Y.; Fischer, G.; and Li, V. C., Nov.-Dec. 2004	792
—Precast concrete decks for slab-on-girder systems: a new approach (101-S40) Mufti, A. A.; Bakht, B.; and Newhook, J. P., May-June 2004	395
Dynamic analysis —Global nonlinear dynamic analysis of concrete chimneys in frequency domain (101-S35) Horr, A. M.; Safi, M.; and Asadpour, N., May-June 2004	341

- Strut-and-tie model for shear friction of concrete with fiber-reinforced polymer composites (101-S86) Saenz, N.; Pantelides, C. P.; and Reaveley, L. D., Nov.-Dec. 2004 863
- Shear strengthening of reinforced concrete beams using fiber-reinforced polymer sheets with bonded anchorage** (101-S65) Adhikary, B. B.; Mutsuyoshi, H.; and Ashraf, M., Sept.-Oct. 2004 660
- Shear strengthening reinforced concrete beams with fiber-reinforced polymer: assessment of influencing parameters and required research** (101-S22) Bousselham, A., and Chaallal, O., Mar.-Apr. 2004 219
- Shear stress**—General analytical model for nominal shear stress of type 2 normal- and high-strength concrete beam-column joints (101-S08) Attaalla, S. A., Jan.-Feb. 2004 65
- Shearwall**
- Design aspects of double skin profiled composite framed shearwalls in construction and service stages (101-S11) Anwar Hossain, K. M., and Wright, H. D., Jan.-Feb. 2004 94
- Load-deformation responses of slender reinforced concrete walls (101-S12) Massone, L. M., and Wallace, J. W., Jan.-Feb. 2004 103
- Nonlinear modeling and analysis of slender reinforced concrete walls (101-S68) Orakcal, K.; Wallace, J. W.; and Conte, J. P., Sept.-Oct. 2004 688
- Shearwalls**—Hysteretic behavior of ferrocement-retrofitted clay tile walls (101-S39) Clarke, R. P., and Sharma, A. K., May-June 2004 387
- Sherif, A.**
- Investigation of pre- and postcracking shear behavior of prestressed concrete beams using innovative measuring techniques (101-S18) Mar.-Apr. 2004 183

—Nonlinear finite element analysis of reinforced concrete beam-column connections (101-S59) Sept.-Oct. 2004	604
Shiau, J.-K. —Torsional behavior of normal- and high-strength concrete beams (101-S31) May-June 2004	304
Shin, M. —Seismic performance of reinforced concrete eccentric beam-column connections with floor slabs (101-S41) May-June 2004	403
Shirvani, M. —Breakout capacity of anchors in concrete—part I: tension (101-S80) Nov.-Dec. 2004	812
Shotcrete —Reinforced concrete bridge column performance enhancement through shotcrete jacketing (101-S34) Hamilton, C. H.; Pardon, G. C.; Navalpakkam, S.; and Kanzanji, R. P., May-June 2004	332
Shrinkage	
—Investigation of minimum longitudinal reinforcement requirements for concrete columns using present-day construction materials (101-S16) Ziehl, P. H.; Cloyd, J. E.; and Kreger, M. E., Mar.-Apr. 2004	165
—Shrinkage cracking and crack control in restrained reinforced concrete members (101-S83) Nejadi, S., and Gilbert, I., Nov.-Dec. 2004	840
—Tension stiffening and cracking of high-strength reinforced concrete tension members (101-S44) Fields, K., and Bischoff, P. H., July-Aug. 2004	447
Shrinkage cracking and crack control in restrained reinforced concrete members (101-S83) Nejadi, S., and Gilbert, I., Nov.-Dec. 2004	840
Slab	
—Acoustic transmission technique for evaluating fatigue damage in concrete bridge deck slabs (101-S01) Butt, S. D.; Limaye, V.; Mufti, A. A.; and Bakht, B., Jan.-Feb. 2004	3
—Fiber-reinforced polymer strengthening of two-way slabs (101-S64) Ehead, U., and Marzouk, H., Sept.-Oct. 2004	650
—Performance of one-way reinforced concrete slabs with externally bonded fiber-reinforced polymer strengthening (101-S19) Arduini, M.; Nanni, A.; and Romagnolo, M., Mar.-Apr. 2004	193
—Seismic performance of reinforced concrete eccentric beam-column connections with floor slabs (101-S41) Shin, M., and LaFave, J. M., May-June 2004	403
—Shrinkage cracking and crack control in restrained reinforced concrete members (101-S83) Nejadi, S., and Gilbert, I., Nov.-Dec. 2004	840
Slabs-on-ground —New design approach for steel fiber-reinforced concrete slabs-on-ground based on fracture mechanics (101-S30) Meda, A., and Pizzari, G. A., May-June 2004	298
Slender column —Flexural stiffness of reinforced concrete columns and beams: experimental verification (101-S37) Khuntia, M., and Ghosh, S. K., May-June 2004	364
Slenderness ratio	
—Interaction formula for reinforced concrete columns in fire conditions (101-S03) Tan, K. H., and Tang, C. Y., Jan.-Feb. 2004	19
—Length effect on ductility of concrete in uniaxial and flexural compression (101-S75) Borges, J. U. A.; Subramaniam, K. V.; Weiss, W. J.; Shah, S. P.; and Bittencourt, T. N., Nov.-Dec. 2004	765
Slip	
—Effect of confinement using fiber-reinforced polymer or fiber-reinforced concrete on seismic performance of gravity load-designed columns (101-S06) Harajli, M. H., and Rteil, A. A., Jan.-Feb. 2004	47
—Experimental studies on behavior of composite steel high-strength concrete beams (101-S25) Nie, J.; Xiao, Y.; Tan, Y.; and Wang, H., Mar.-Apr. 2004	245
—Cyclic behavior of columns with short lap splices (101-S79) Melek, M., and Wallace, J. W., Nov.-Dec. 2004	802
Sonavar, M. O. —Rehabilitation of reinforced concrete frames with reinforced concrete infills (101-S49) July-Aug. 2004	494
Soudki, K. A. —Experimental and analytical evaluation of bond strength of reinforcement in fiber-reinforced polymer-wrapped high-strength concrete beams (101-S73) Nov.-Dec. 2004	747
Spadea, G. —Analytical model to evaluate failure behavior of plated reinforced concrete beams strengthened by shear (101-S74) Nov.-Dec. 2004	755
Spathis, L. —Fiber-reinforced polymer retrofitting of rectangular reinforced concrete columns with or without corrosion (101-S51) July-Aug. 2004	512
Splice	
—Effect of confinement of bond strength between steel bars and concrete (101-S58) Harajli, M. H.; Hamad, B. S.; and Rteil, A. A., Sept.-Oct. 2004	595
—Experimental and analytical evaluation of bond strength of reinforcement in fiber-reinforced polymer-wrapped high-strength concrete beams (101-S73) Hamad, B. S.; Soudki, K. A.; Harajli, M. H.; and Rteil, A. A., Nov.-Dec. 2004	747
Splitting —Effect of confinement using fiber-reinforced polymer or fiber-reinforced concrete on seismic performance of gravity load-designed columns (101-S06) Harajli, M. H., and Rteil, A. A., Jan.-Feb. 2004	47

Splitting tensile strength

—Influence of constituents of concrete on its tensile strength and shear strength (101-S04) Dcsai, S. B., Jan.-Feb. 2004	29
—Mechanical properties of high-strength concrete for prestressed members (101-S45) Hueste, M. B. D.; Chomprea, P.; Trejo, D.; Cline, D. B. H.; and Keating, P. B., July-Aug. 2004	457
Steel —Confining reinforcement for high-strength concrete columns (101-S32) Li, B., and Park, R., May-June 2004	314
Steel sheet —Design aspects of double skin profiled composite framed shearwalls in construction and service stages (101-S11) Anwar Hossain, K. M., and Wright, H. D., Jan.-Feb. 2004	94
Stiffness	
—Design aspects of double skin profiled composite framed shearwalls in construction and service stages (101-S11) Anwar Hossain, K. M., and Wright, H. D., Jan.-Feb. 2004	94
—Effective torsional rigidity of reinforced concrete members (101-S26) Tavio and Teng, S., Mar.-Apr. 2004	252
—Load-deformation responses of slender reinforced concrete walls (101-S12) Massone, L. M., and Wallace, J. W., Jan.-Feb. 2004	103
—Shear stiffness and strength of horizontal construction joints (101-S48) Djazmati, B., and Pincheira, J. A., July-Aug. 2004	484
Stirrup	
—Double-head studs as shear reinforcement in concrete i-beams (101-S55) Gayed, R. B., and Ghali, A., July-Aug. 2004	549
—Minimum transverse reinforcement in 65 MPa concrete beams (101-S87) Rahal, K. N., and Al-Shaleh, K. S., Nov.-Dec. 2004	872
Strain	
—Composite response of high-strength concrete confined by circular steel tube (101-S46) McAteer, P.; Bonacci, J. F.; and Lachemi, M., July-Aug. 2004	466
—Shear behavior of full-scale post-tensioned prestressed concrete bridge girders (101-S17) Oh, B. H., and Kim, K. S., Mar.-Apr. 2004	176
—Stress distribution in cyclically loaded reinforced concrete beams (101-S27) Heffernan, P. J.; Erki, M.-A.; and DuQuesnay, D. L., Mar.-Apr. 2004	261
Strength	
—Analysis and design of concrete columns for biaxial bending—overview (101-S42) Furlong, R. W.; Hsu, C.-T. T.; and Mirza, S. A., May-June 2004	413
—Anchorage length of near-surface mounted fiber-reinforced polymer rods for concrete strengthening—analytical modeling (101-S38) De Lorenzis, L., May-June 2004	375
—Bond mechanism of near-surface-mounted fiber-reinforced polymer bars for flexural strengthening of concrete structures (101-S82) Hassan, T. K., and Rizkalla, S. H., Nov.-Dec. 2004	830
—Cracking behavior of reinforced concrete panel subjected to biaxial tension (101-S09) Cho, J.-Y.; Kim, N.-S.; Cho, N.-S.; and Choi, I.-K., Jan.-Feb. 2004	76
—Design aspects of double skin profiled composite framed shearwalls in construction and service stages (101-S11) Anwar Hossain, K. M., and Wright, H. D., Jan.-Feb. 2004	94
—Effect of confinement using fiber-reinforced polymer or fiber-reinforced concrete on seismic performance of gravity load-designed columns (101-S06) Harajli, M. H., and Rteil, A. A., Jan.-Feb. 2004	47
—Experimental and analytical evaluation of bond strength of reinforcement in fiber-reinforced polymer-wrapped high-strength concrete beams (101-S73) Hamad, B. S.; Soudki, K. A.; Harajli, M. H.; and Rteil, A. A., Nov.-Dec. 2004	747
—Fiber-reinforced polymer retrofitting of rectangular reinforced concrete columns with or without corrosion (101-S51) Bousias, S. N.; Triantafillou, T. C.; Fardis, M. N.; Spathis, L.; and O'Regan, B. A., July-Aug. 2004	512
—Fiber-reinforced polymer strengthening of two-way slabs (101-S64) Ehead, U., and Marzouk, H., Sept.-Oct. 2004	650
—Minimum transverse reinforcement in 65 MPa concrete beams (101-S87) Rahal, K. N., and Al-Shaleh, K. S., Nov.-Dec. 2004	872
—Near-surface-mounted fiber-reinforced polymer reinforcements for flexural strengthening of concrete structures (101-S71) El-Hacha, R., and Rizkalla, S. H., Sept.-Oct. 2004	717
—Performance of one-way reinforced concrete slabs with externally bonded fiber-reinforced polymer strengthening (101-S19) Arduini, M.; Nanni, A.; and Romagnolo, M., Mar.-Apr. 2004	193
—Prediction of crack width for fiber-reinforced polymer-reinforced concrete beams (101-S53) Salih, S. R., and Abdel-Sayed, G., July-Aug. 2004	532
—Punching shear strength of slabs with openings and supported on rectangular columns (101-S67) Teng, S.; Cheong, H. K.; Kuang, K. L.; and Geng, J. Z., Sept.-Oct. 2004	678
—Rehabilitation of reinforced concrete frames with reinforced concrete infills (101-S49) Sonavar, M. O.; Ozcebe, G.; and Ersoy, U., July-Aug. 2004	494

—Shear stiffness and strength of horizontal construction joints (101-S48) Djazmati, B., and Pincheira, J. A., July-Aug. 2004	484
—Shear strengthening reinforced concrete beams with fiber-reinforced polymer: assessment of influencing parameters and required research (101-S22) Boussetlam, A., and Chaallal, O., Mar.-Apr. 2004	219
Strengthening of cantilever and continuous beams using new triaxially braided ductile fabric (101-S24) Grace, N. F.; Ragheb, W. F.; and Abdel-Sayed, G., Mar.-Apr. 2004	237
Stress	
—Composite response of high-strength concrete confined by circular steel tube (101-S46) McAteer, P.; Bonacci, J. F.; and Lachemi, M., July-Aug. 2004	466
—Flexural behavior of hybrid fiber-reinforced polymer/concrete beam/slab bridge component (101-S23) Burgueño, R.; Davol, A.; Zhao, L.; Seible, F.; and Karbhari, V. M., Mar.-Apr. 2004	228
—Horizontal cracking in continuously reinforced concrete pavements (101-S77) Kim, S.-M., and Won, M. C., Nov.-Dec. 2004	784
—Rectangular stress block for high-strength concrete (101-S47) Ozbakkaloglu, T., and Saatcioglu, M., July-Aug. 2004	475
—Stress redistribution in cyclically loaded reinforced concrete beams (101-S27) Heffernan, P. J.; Erki, M.-A.; and DuQuesnay, D. L., Mar.-Apr. 2004	261
Stress redistribution in cyclically loaded reinforced concrete beams (101-S27) Heffernan, P. J.; Erki, M.-A.; and DuQuesnay, D. L., Mar.-Apr. 2004	261
Stress-strain —Stress-strain relationship of reinforced concrete subjected to biaxial tension (101-S20) Cho, J.-Y.; Kim, N.-S.; Cho, N.-S.; and Choun, Y.-S., Mar.-Apr. 2004	202
Stress-strain relationship of reinforced concrete subjected to biaxial tension (101-S20) Cho, J.-Y.; Kim, N.-S.; Cho, N.-S.; and Choun, Y.-S., Mar.-Apr. 2004	202
Structural capacity reduction for drilled shafts with minor flaws (101-S29) Sarhan, H. A.; O'Neill, M. W.; and Tabsh, S. W., May-June 2004	291
Structural testing of enhanced post-tensioned concrete masonry walls (101-S85) Laursen, P. T., and Ingham, J. M., Nov.-Dec. 2004	852
Strut-and-tie —Strut-and-tie model for shear friction of concrete with fiber-reinforced polymer composites (101-S86) Saenz, N.; Pantelides, C. P.; and Reaveley, L. D., Nov.-Dec. 2004	863
Strut-and-tie model for shear friction of concrete with fiber-reinforced polymer composites (101-S86) Saenz, N.; Pantelides, C. P.; and Reaveley, L. D., Nov.-Dec. 2004	863
Stud —Double-head studs as shear reinforcement in concrete I-beams (101-S55) Gayed, R. B., and Ghali, A., July-Aug. 2004	549
Subramaniam, K. V. —Length effect on ductility of concrete in uniaxial and flexural compression (101-S75) Nov.-Dec. 2004	765
Surface —Analysis and design of concrete columns for biaxial bending—overview (101-S42) Furlong, R. W.; Hsu, C.-T. T.; and Mirza, S. A., May-June 2004	413
Swamy, R. N. —Analytical model to evaluate failure behavior of plated reinforced concrete beams strengthened for shear (101-S74) Nov.-Dec. 2004	755

T

Tabsh, S. W. —Structural capacity reduction for drilled shafts with minor flaws (101-S29) May-June 2004	291
Tan, K. H. —Interaction formula for reinforced concrete columns in fire conditions (101-S03) Jan.-Feb. 2004	19
Tan, Y. —Experimental studies on behavior of composite steel high-strength concrete beams (101-S25) Mar.-Apr. 2004	245
Tang, C. Y. —Interaction formula for reinforced concrete columns in fire conditions (101-S03) Jan.-Feb. 2004	19
